I don't write reviews usually, but this game is one of my favourites of all time (plus Serious Sam DD). I used to play them on the 360 before it got the red ring of death, was happy to replay them here on steam. The art is so unique (like heavy metal fan art, but in a good way). It just feels great to play, it is funny and original. The gun mechanics added to the run n gun style is unique and interesting. I love just to relax and play these games. It is so refreshing to find a unique voice like this in games. This game was my introduction to indie games and is still one of my favourites. I'm a fan of Mommy's Best Games, highly recommended.. Quirky with 16-bit like gameplay. I really like the graphic style and recommend to anyone wanting to play a action platform game that is very similar to many of the old classics.. Half of me is wondering how high the art team had to get to design most of the creatures in this game. I am thankful for the awesome enemies to shoot and figure out, but I really worry about your long term health... I mean, you can smoke yourself insane ya know?

The other half of me is smiling with glee at a unique and just plain FUN game that doesn't take itself too seriously, can be blown through in an hour, and still have the "try one more time" factor to make me want to play again and again. Neat storyline, fun gameplay, lot of fun things to discover while playing the game too. GREAT JOB!!!

Highly recomend, yep!. Cool engine and lots of attention to detail, but I hated it.. buy it on discount
good control, beautiful graphic
finish the game in 12 mins ^^
auto slow motion before death this make u unable to die
suitable for guys who frustrated dying too much in dark soul like game

Highly recomend, yep!. <https://www.youtube.com/watch?v=Wb0tGXZ1QH8>. a fun fast-paced platformer where your lives are all different characters, each with their own inventive and nifty weapon. one lady has a chainsaw gun, there's a dude who fires mines around, a weird floating laser robot gun, and many other things. it's great, the areas and monsters are all crazy and great, the slow-mo bullet dodging thing is great, weapon of choice is great. ♥♥♥♥♥ing buy it already!. Sweet art and animation. Ridiculously fun powers and giant enemies. It's fun to switch characters since they each have their own abilities and unique weapons.. Man now this my kind of game!! Love the metal sound track and the graphics are absolutely stunning!! Way better than what you see in the demo. Such attention to detail and huge cool bosses!!. See that means the devs really care about what type of product they are putting out and that means a lot to me. I just love little small details in the back ground. Trees swaying, enemies breathing all that. Controls great too with a Xbox controller.Kind of reminds me of the old school Contra for the SNES. Great selection of weapons and characters too. And what a steal at only \$4.99!! I could say more but i'm about to dive deeper into this sweet little game!! Go buy this game and support these devs!! Haha :D. Short, fun, fast and action packed with great music.

Not the best by MBG but for a low price it can offer a few hours of good quality fun. Especially if you try to complete all the achievements.
